13<sup>th</sup> June 2007

**To whom it may concern**

Don Clark

Worked very hard to get planning permission for a factory and 14 flats, constructing an imaginative scheme on an area of land which was being scheduled for industrial use alone. The application was a very detailed one: One of my property colleagues said that "it read like an appeal", dealing with all possible objections that the Planners, who were initially not keen on the development, could raise or think of.

Significantly through his skill and judgement, and against my expectations, planning was obtained. The planning gain, coming from the sale of the land for the Flats will produce the majority of the funds to construct our new, and very necessary, factory.

Please do not hesitate to contact me for further details

Richard Wylde MA. PhD CEng FIEE
